Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicants proposed limiting radical B1 in claim 108 to a "nucleobase". This would overcome the indefiniteness rejections made in points #9-#12 of the previous office action. There was a lengthy discussion of the meaning of nucleobase, which the Examiner views as functional. Applicants proposed citing a textbook in biochemistry or a review article to illustrate the art-recognized meaning of this term. This would be a satisfactory resolution to the issues posed in points #8 and #14. Applicants proposed incorporation of the formulas of their desired phosphono peptide radical discussed in point #13 .
